

Landscape Character Assessment Report

Introduction

The landscape character assessment purpose is to update previous information from 2006.

The report came in two sections, an online survey and an interactive map where comments could be left.

Proposed answers are below.

Online Survey Proposed Questions and Answers

1. Do you use the East Hampshire LCA?

Yes

2. If you answered yes, how do you use the East Hampshire LCA?

Marked some points of interest and made comments regarding those points.

3. Please highlight what you feel are most important about the Landscape Character Areas you know.

All of the items are equally important and relevant to our area.

4. How do you think the landscape in East Hampshire is changing? This may be positive or negative.

Multitudes of new housing throughout East Hampshire especially in Whitehill and Bordon are changing the landscape. This is positive and negative but infrastructure needs to be put in place earlier. We welcome further SPA's SANG, SSSI and SAMMs as these are used by locals and visitors alike.

Interactive Map

A point on the map is to be marked in the centre of Whitehill and Bordon. The comment proposed is :

Whitehill and Bordon is surrounded by SSSI, SANG, SAMMs and SPA's. Future house building is pushing the boundary of Whitehill and Bordon further out giving development creep. All future developments must have consultation prior to building commencement to avoid this.
